### SUMMARY

Experienced Full Stack Developer with 5+ years of expertise in designing, developing, and deploying scalable web applications. Proficient in modern frameworks including React.js, Next.js, and Node.js, with significant experience in database management using MongoDB and MySQL. Experienced in cloud infrastructure, utilizing AWS and Docker for optimized deployment pipelines. Focused on delivering high-quality solutions with an emphasis on SEO and performance optimization

### EXPERIENCE

#### Full Stack Web Developer

Aursoft PVT LTD

06/2018 – 07/2021

Islamabad – Pakistan

- Designed and deployed 10+ scalable web applications using React.js, Next.js, and Node.js.
- Optimized backend services, leading to a **30%** reduction in API response time. Managed cloud deployments on **AWS (EC2, S3, RDS)**, achieving **99.9%** application uptime.
- Collaborated with design teams to create user-friendly interfaces, increasing user engagement by **25%**. Automated deployment pipelines, reducing release cycles by **40%**.
- Provided post-launch support for multiple projects, achieving a **95%** client satisfaction rate.

#### Back End Engineer

Ferisoft Software House

08/2021 - 08/2022

Remote, Türkiye

- Designed and deployed scalable web applications using **React.js**, **Next.js**, and **Node.js**.
- Optimized reusable components, cutting development time for new projects by **15%**.
- Developed and maintained **5+** full-stack web applications using **PHP**, **JavaScript**, and **MySQL**, improving application efficiency by **30%**.
- Implemented backend APIs and integrated third-party services, reducing system integration time by **25%**.

#### Full Stack Web Developer

Fujtown LLC

03/2023 - Present

Fujairah, UAE

- Spearheaded product-based development projects, focusing on full stack technologies.
- Debugged code across multiple projects, reducing bugs by **30%**. Enhanced server management with CPANEL optimizations, reducing downtime by **15%**.
- Authored detailed project documentation, streamlining team workflow and reducing project delays by **20%**.
- Apply a custom inventory management system that improved stock tracking accuracy by **35%**.

## PROJECTS

### fujtown.com (Business Directory Provider)

- Developed a full-stack business directory platform using **Laravel (backend)** and **Vue.js (frontend)**, enabling seamless business registration, listing management, and search functionality.
- Designed and implemented user authentication and role-based access control, allowing businesses to register, update profiles, and manage services, while administrators-maintained directory quality and approvals.
- Integrated advanced filtering and search features for end-users to easily discover businesses by category, location, and services, improving usability and customer engagement.
- Optimized performance and scalability through **RESTful API** development, Vue.js components, and database indexing, ensuring a smooth experience for thousands of business listings and user interactions.

### ypt.com (Online Fitness Coaching)

- Built a full-stack online fitness coaching platform using **Next.js (frontend)** and **Laravel (backend)**, delivering a responsive and **SEO-optimized** experience for users across web and mobile.
- Implemented secure user authentication, payments, and subscriptions, enabling clients to register, purchase fitness programs, and access personalized coaching content.
- Developed interactive course and challenge modules, including onboarding questionnaires, calorie calculators, and progress tracking, to provide tailored fitness plans and engagement.
- Optimized API performance and real-time data flow between **Laravel backend** and **Next.js** frontend, ensuring smooth program delivery and user tracking with minimal latency.

### autorijsschooldutchdriving.nl (Driving School Lesson)

- Developed a driving school management platform in **Laravel** to showcase courses, instructors, and services with a focus on affordability and high student success rates.
- Implemented student registration, booking, and scheduling modules, allowing learners to easily enroll in driving lessons and track progress.
- Integrated performance tracking and reporting features, enabling administrators to monitor student pass rates and highlight the school's high success rate.

### inventory.aursoft.com (Inventory & POS)

- Built a complete Inventory & POS management system using **CodeIgniter 3 (backend)** and **Sencha (JavaScript library for frontend)**, providing a seamless interface for businesses.
- Implemented real-time inventory tracking and stock management, ensuring accurate product availability, **low-stock alerts**, and automated updates across sales channels.
- Developed **POS** modules with invoice generation, customer management, and sales reporting, streamlining daily operations for retail businesses.
- Optimized system performance with modular **CodeIgniter** architecture and reusable **Sencha** components, improving scalability and maintainability of the application.
